SERGIO PIÑEROS

PRODUCT MANAGER / FOUNDER & HANDS-ON PRODUCT BUILDER

Minneapolis, MN • s.dpineros@gmail.com • linkedin.com/in/sergio-pineros-c
Portfolio: sergiopineros.com • Product work: savronmn.com / nxtseat.co

PROFILE

Founder and bilingual (English–Spanish) product builder with hands-on experience turning customer problems into software workflows, prototypes, and launched digital experiences. Work spans B2B service operations, conversational AI, and an early-stage two-sided marketplace concept in live music. Comfortable working directly with business owners, designing clear user journeys, coordinating delivery, and connecting product decisions to business outcomes.

SELECTED PRODUCT EXPERIENCE

SAVRON BUSINESS OS | Product Development & Customer Workflows

2026–Present • Barbershop operations / customer-facing software

• Worked directly with shop stakeholders to map distinct needs for guests, barbers, front desk, and ownership; helped translate those needs into practical booking and operations workflows.

• Helped develop customer booking, walk-in and check-in experiences, calendar and communication flows, and staff-facing operational tools.

• Piloted a bilingual AI voice concierge for customer inquiries and scheduling; explored how conversational interfaces can reduce friction without losing the human service experience.

• Connected interface decisions to everyday shop realities: arrivals, staff availability, service selection, and follow-up.

NXTSEAT | Founder / Product Exploration

2026–Present • B2B SaaS for independent shops

• Developing a voice-first operating platform concept for barbershops and wellness businesses, informed by hands-on work with local service operators.

• Explored scheduling, service configuration, memberships, customer communications, and payments as connected parts of one workflow—not isolated features.

• Use rapid design and AI-assisted prototyping to test interaction ideas and communicate product direction before committing to broader implementation.

MUSICCONNECT | Two-Sided Marketplace Concept

Exploration through 17 Bits Records

• Explored a marketplace concept connecting musicians seeking opportunities with organizers booking talent; considered discovery, profiles, matching, and the booking journey from both sides.

• Grounded the concept in first-hand experience coordinating artists and concerts. The project remained an early exploration and did not commercially launch.

PROFESSIONAL EXPERIENCE

SERGIO & CO. | Founder & Digital Strategy Lead

Jan 2026–Present • Independent studio

• Partner with wellness, barbering, beauty, and editorial clients to understand customer needs and turn ambiguous business requirements into digital experiences and actionable work.

• Move between stakeholder conversations, interface concepts, hands-on prototyping, creative direction, and launch coordination; maintain direct accountability to the client.

FOFO LABS | Founder & Growth Lead

Apr 2025–Jan 2026 • Marketing / digital services

• Acquired initial customers, created repeatable service offerings, and coordinated a four-person team across client relationships, production, campaign planning, and delivery.

• On La Estancia Steakhouse campaign helped achieve ~540,000 TikTok views and 1,200+ new followers in month one; the client also reported approximately $32,000 in additional revenue and 46% location growth during the campaign period.

• Used creative performance and client feedback to adjust priorities and understand what customers valued—not just what received attention.

17 BITS RECORDS | Co-Founder & Creative Director

2021–Present • Colombia / remote • Currently part-time

• Co-founded an independent record label supporting artists with creative direction, releases, promotion, and collaborative projects.

• Helped coordinate live events, concerts, workshops, artists, and partners; developed first-hand familiarity with fragmented discovery and coordination in entertainment.

HP TECH VENTURES | Startup Analysis Externship

Mar–May 2026

• Researched markets and early-stage companies, compared opportunities, and evaluated startups through business and investment criteria.
